## PORTFOLIO

[GitHub link ↗](#)

## PROJECTS

### [Online Library ↗](#)

Sep 2024 - Oct 2024

Technologies used: React, Redux, React Router, JavaScript, CSS  
Description: Developed a full-featured online library application allowing users to browse, add, and view books by category. Integrated Redux for state management and React Router for smooth client-side navigation. Key Features: Browse books by category and filter by title or author. View detailed information about each book. Add new books to the library dynamically. Skills demonstrated: Front-end development, state management, client-side routing, responsive design.

### [Weather Forecast Application ↗](#)

May 2024

Technologies used: HTML, Tailwind CSS, JavaScript, OpenWeather API  
Description: Developed a responsive web application that provides real-time weather updates for any location worldwide. Integrated the OpenWeather API to fetch and display current temperature, weather conditions, humidity, and wind speed based on user input.

### SKILLS

- HTML
- CSS
- JavaScript
- ReactJS
- Data Structures

### [To Do List ↗](#)

Sep 2024 - Oct 2024

Technologies used: React, JavaScript, CSS  
Description: Built a simple yet efficient to-do list application demonstrating CRUD operations. The app allows users to add, edit, delete, and mark tasks as completed. It also features local storage to persist tasks between sessions. Key Features: Add, edit, and delete tasks. Mark tasks as completed with a visual update. Filter tasks based on completion status. Skills demonstrated: React components, state management, local storage usage.
